

A toothbrush to clean your teeth and your tongue, as well

BRUSH CARE

Surprising 360° omni-directional massage experience!

Acclaimed by dentists and dental hygienists.

The brush head only contains **ECO** resin components. The bristles do not contain any metal, so the head can be recycled without worry.

※ Descriptions printed on the actual products are only written in Japanese.

A toothbrush designed with function in mind, for healthier teeth.

This brush is also perfect for cleaning your tongue, which helps deal with bad breath.

- These high quality bristles are made from a mixture of natural minerals and nylon. Your teeth will be smooth and shiny white when you brush them with water alone.
- This barrel-shaped toothbrush allows you to move your hand freely while brushing your teeth and cleaning your tongue. No need to rotate your wrist.
- You can use this toothbrush to clear the white coating from your tongue and debris from false teeth and partial plates. This makes it is effective for preventing bad breath.

Contains natural minerals.

You can even brush your teeth with plain water; no tooth paste!

BRU-2

BRU-2

A toothbrush to clean your teeth and your tongue, as well

Gentle on teeth and tongue

NARUTO BRUSH-CARE

The barrel-shaped toothbrush head conforms to the inner surfaces of your mouth

You can brush using the recommended basic method, and hold the toothbrush the way that feels most comfortable to you. Please check out the way to hold and use the brush that suits you best.

How to use NARUTO Brush Care

- 1 Brushing the rear teeth's chewing surfaces**
To clean the biting (occlusal) surfaces: bite down gently on the toothbrush. Move it up and down, back and forth, to brush the upper and lower surfaces at the same time.
- 2 Brushing the outer surfaces of the front teeth**
Place the brush parallel with the row of teeth and move the brush sideways using small movements.
- 3 Gum massage**
Brush sideways over your gums, just like you do when brushing your teeth, to give yourself a good gum massage.
- 4 Cleaning your tongue**
Move the brush from back to front over your tongue. You'll be amazed how effective this is at removing that tongue coating.

5 Care of dentures and mouth guards

In order to keep these items clean, it is necessary to take care of them every day.

Features of NARUTO Brush Care

- Petal-shaped soft rubber separators are sandwiched between the bristles to make sure the bristles brush your teeth and massage your gums thoroughly. The best toothbrush for preventing periodontal disease!
- The nylon bristles gently massage your gums. Supported by the soft rubber padding, they give your gums a comfortable massage.
- This toothbrush is also effective for dentures, mouth guards, and for preventing bad breath by brushing the interior sides of your teeth and removing white coating from your tongue.
- The barrel-shaped toothbrush head is easy to use by children, the elderly, the visually impaired, and caregivers.
- This toothbrush helps maintain the beauty and health of your entire mouth, because its barrel shape stimulates the gums and the insides of the cheeks.
- The ridged pattern of the bristle surface gets into the gaps and uneven spots in your rows of teeth.
- An eco-friendly toothbrush! No metal in the bristles, and the brush head is replaceable.
- A carefully crafted toothbrush with a high-performance design configured for preserving dental health. You'll recognize the difference right away, when you use it!
